

R L Laughlin VIACELL-10

Cellular Status Monitoring with Alarming via SMS, Voice, and / or Email

Overview

The ViaCell-10 is a magnetic-mount, cellular monitoring device with built-in solar panel and batteries, ideal for monitoring the status of pumpjacks, compressors, generators, and more.

ViaCell-10 provides run status alerts, GPS coordinates, as well as temperature readings.

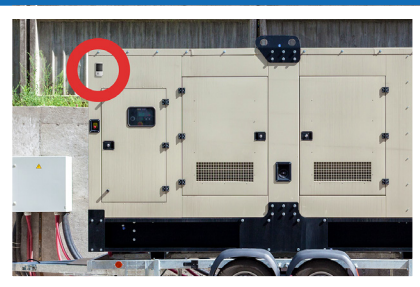

Escalating alarm call-lists can be set up to alert personnel, via SMS, Email, and/or Voice messages, when vibration has stopped or started.
